Summary

Software developer with hands-on experience in building and maintaining scalable, high-performance backend systems using Golang. Proficient in designing microservices architecture, optimizing performance, and solving complex software challenges. Strong foundation in cloud technologies, containerization, and distributed systems. Enthusiastic about learning new technologies and improving code efficiency while adhering to best development practices.

Education

Belarusian State University of Informatics and Radioelectronics

2023-2027

Faculty of Computer Systems and Networks, Computer Science and Software Technology

Experience

Software Engineer

July 2023-September 2024

SysInformatics

- Worked in team focused of Cloud Infastructure
- Solved some runtime optimization problems
- Devepment high-load microservices

Technologies

Languages: Golang , C++

Developers Tools: Gin, Gorilla, GRPC, Fiber, Echo, GoogleTest, Kafka, Kubernetes, Graphana

FrameworksLibraries: Git,Bash,Linux,Docker, SSH CMake

DataBases: MySQL,PostgreSQL

Math Linear Algebra, Graphs theory,Discrete math, Probability theory, Theory of algorithms

English B2
